ACADEMIC DIAGNOSTIC AND INTERVENTIONAL NEURORADIOLOGIST:
Vancouver, BC, Canada

Vancouver Coastal Health (VCH) is seeking a full-time clinical and academic Neuroradiologist with fellowship training in Interventional Neuroradiology to join a dynamic group of 27 academic radiologists providing general and subspecialty diagnostic and interventional radiological services to Vancouver General Hospital and UBC Hospital, both integral parts of the University of British Columbia hospital system. Preferred start date is July 1, 2016.

The successful candidate will be part of a five member neurointerventional service (consisting of three interventional neuroradiologists and two endovascular neurosurgeons). A significant portion of clinical time will be spent in diagnostic neuroradiology. The successful applicant will be primarily located at Vancouver General Hospital, and will be part of a team of six fellowship-trained Neuroradiologists (www.neuroradiology.ca).

All candidates must hold an MD degree (or equivalent), have completed Fellowship training in Diagnostic and Interventional Neuroradiology, and be eligible for licensure in the Province of British Columbia. All applicants must also be currently certified by, or eligible for certification by, the Royal College of Physicians and Surgeons of Canada. Subspecialty certification in Neuroradiology is desired.

Teaching activities include Undergraduate instruction and supervision of Residents in Diagnostic Radiology and affiliated specialties. The Neuroradiology Fellowship Program is based at Vancouver General Hospital, and currently accepts four Clinical Fellows annually. In addition to teaching responsibilities, there are many research opportunities available throughout the UBC Neurosciences specialties as Vancouver General Hospital serves as the main site for Residency/Fellowship training in disciplines such as Neurology (including Stroke Neurology), Neurosurgery, Spine Surgery, Psychiatry, Ophthalmology, and Otolaryngology. The Neuroradiology Division is currently involved in multiple areas of research, including several stroke studies, diffusion tensor projects, as well as advanced MRI assessment of spinal and psychiatric conditions. The successful applicant will be expected to contribute to the Division’s academic mandate, and preference will be given to candidates with a record of grant-supported research. Clinical experience and research background in advanced MR techniques and head and neck imaging are preferred.

The city of Vancouver is the largest city in Western Canada, and has been consistently ranked among the world’s most livable cities. Remuneration and vacation arrangements are competitive for the geographic region. Following a successful probation period, the candidate will have the opportunity to join this collaborative practice. University appointment at the University of British Columbia will be granted in the clinical stream commensurate with previous rank/experience.

VCH and UBC hire on the basis of merit and are committed to employment equity. All qualified persons are encouraged to apply. UBC is strongly committed to diversity within its community and especially welcomes applications from visible minority group members, women, Aboriginal persons, persons with disabilities, persons of any sexual orientation or gender identity, and others who may contribute to the further diversification of ideas. However, Canadian and permanent residents of Canada will be given priority.

All applications must be received by April 30, 2016. Interested candidates are asked to submit their letter of intent, curriculum vitae, and names of three referees to:
